## mmu-miR-7651-5p miRNA Inhibitor

| Catalog #      | Source    | Reactivity              | Applications   |
|----------------|-----------|-------------------------|--|
| CIM1753        | Synthetic | М                       |  |
| Description    | Synt      | hetic miRNA inhibito    | s are used to inhibit mmu-miR-7651-5p by transfaction.   |
| Specificity    | miRI      | NA Inhibitors are che   | nically synthesized, complementary, antisense            |
|                | singl     | e-stranded oligonucl    | eotides to their target, endogenous mature miRNA. It     |
|                | effec     | ctively prevents the ta | rget miRNA to bind to normal cellular binding sites.     |
|                | Tran      | sfection of inhibitors  | followed by downstream gene expression analysis or       |
|                | pher      | notypic analysis, is pe | rformed to elucidate the targets and roles of particular |
|                | miRI      | NAs.                    |  |
| Form           | Lyop      | hilized powder          |  |
| Gene Symbol    | mmı       | u-miR-7651-5p           |  |
| Accession No.  | MIN       | IAT0029804              |  |
| Components     | This      | synthetic miRNA is b    | ased on the mature miRNA sequence. It does not contain   |
|                | the f     | ull precursor miRNA     | stem-loop.   |
| Directions for | Use Wer   | ecommend re-suspe       | nding the lyophilized synthetic miRNA using DNase and    |
|                | RNa       | se-free ddH2O. To ma    | ke a 100 uM stock, dissolve the lyophilized powder using |
|                | 100       | ul of ddH2O.            |  |
| Storage/Stabi  | lity Ship | ped at 4 °C. Store at - | 20 °C for one year. Avoid freeze-thaw cycles after       |
|                | reco      | nstitution.             |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
