

## **Product Data Sheet**

## rno-miR-365-5p miRNA Inhibitor

| Catalog #      | Source           | Reactivity               | Applications   |
|----------------|------------------|--------------------------|--|
| CIR0477        | Synthetic        | R                        |  |
| Description    | Syn              | thetic miRNA inhibitor   | s are used to inhibit rno-miR-365-5p by transfaction.    |
| Specificity    | miR              | NA Inhibitors are cher   | nically synthesized, complementary, antisense            |
|                | sing             | le-stranded oligonucle   | eotides to their target, endogenous mature miRNA. It     |
|                | effe             | ctively prevents the ta  | rget miRNA to bind to normal cellular binding sites.     |
|                | Trar             | nsfection of inhibitors  | followed by downstream gene expression analysis or       |
|                | phe              | notypic analysis, is pe  | formed to elucidate the targets and roles of particular  |
|                | miR              | NAs.                     |  |
| Form           | Lyoj             | ohilized powder          |  |
| Gene Symbol    | rno              | -miR-365-5p              |  |
| Accession No.  | MIN              | /IAT0017184              |  |
| Components     | This             | synthetic miRNA is ba    | used on the mature miRNA sequence. It does not contain   |
|                | the              | full precursor miRNA     | stem-loop.   |
| Directions for | <b>Use</b> We    | recommend re-suspe       | nding the lyophilized synthetic miRNA using DNase and    |
|                | RNa              | se-free ddH2O. To ma     | ke a 100 uM stock, dissolve the lyophilized powder using |
|                | 100              | ul of ddH2O.             |  |
| Storage/Stabi  | <b>lity</b> Ship | oped at 4 °C. Store at - | 20 °C for one year. Avoid freeze-thaw cycles after       |
|                | reco             | onstitution.             |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
