

## **Product Data Sheet**

## hsa-miR-4520-3p miRNA Mimic

| Catalog #      | Source      | Reactivity              | Applications   |
|----------------|-------------|-------------------------|--|
| CMH1347        | Synthetic   | н                       |  |
| Description    | Synthe      | etic miRNA mimics a     | re used to overexpress hsa-miR-4520-3p by transfaction.  |
| Specificity    | miRNA       | A Mimics are chemic     | ally modified, double-stranded miRNA-like RNA which are  |
|                | desigr      | ned to copy the funct   | ionality of mature endogenous miRNA upon transfection.   |
|                | At the      | 5'-end, it is synthesi  | zed with a partially complementary motif to 3'UTR end of |
|                | the ta      | rget gene, which allo   | ws the miRNA mimic to specifically bind to the target.   |
|                | Transf      | ection of mimics foll   | owed by downstream gene expression analysis or           |
|                | pheno       | otypic analysis, is per | formed to elucidate the targets and roles of particular  |
|                | miRNA       | As.                     |  |
| Form           | Lyoph       | ilized powder           |  |
| Gene Symbol    | hsa-m       | iR-4520-3p              |  |
| Accession No.  | . MIMA      | T0019057                |  |
| Components     | This sy     | ynthetic miRNA is ba    | sed on the mature miRNA sequence. It does not contain    |
|                | the fu      | ll precursor miRNA s    | tem-loop.  |
| Directions for | Use We re   | commend re-suspen       | ding the lyophilized synthetic miRNA using DNase and     |
|                | RNase       | -free ddH2O. To mal     | e a 100 uM stock, dissolve the lyophilized powder using  |
|                | 50 ul c     | of ddH2O.               |  |
| Storage/Stabi  | lity Shippe | ed at 4 °C. Store at -2 | 0 °C for one year. Avoid freeze-thaw cycles after        |
|                | recons      | stitution.              |  |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
