

Product Data Sheet

hsa-miR-448 miRNA Agomir

Catalog #	Source	Reactivity	Applications			
CMJ0210	Synthetic	н				
Description	Synth	etic miRNA Agomir is	used to regulate the expression of target hsa-miR-448			
	mRNA	λ.				
Specificity	Agom	ir is chemically-modi	fied double-strand miRNA mimics which can mimic			
	matur	re endogenous miRN	As after transfection into cells. They can up-regulate the			
	endo	genous miRNA activit	y by utilizing the natural miRNA machinery. Our miRNA			
	agom	ir is designed to mim	ic mature miRNAs, and chemically modified to increase			
	theirs	stability and activity.				
Form	Lyoph	ilized powder				
Gene Symbol	hsa-m	niR-448				
Accession No.	MIMA	AT0001532				
Components	This s	This synthetic miRNA is based on the mature miRNA sequence. The antisense strand				
	of the	agomir has 2 phosp	norothioates at the 5' end, 4 phosphorothioates, 1			
	choles	sterol group at the 3'	end, and full-length nucleotide 2'-methoxy modification.			
	It exh	ibits enhanced cellul	ar uptake, stability and regulatory activity in vivo.			
Directions for U	lse Briefly	y centrifuge tubes co	ntaining miRNA agomir to ensure that the miRNA pellet is			
	locate	ed at the bottom of th	ne tube. Dissolve miRNA agomir to a convenient stock			
	conce	ntration using the re	commended volume of DEPC H2O (or RNase-free water).			
	For ex	ample: dissolve 5 nn	nol miRNA agomir to 20 μ M using 250 μ l DEPC H2O (or			
	RNase	e-free water). Pipette	the solution up and down 3-5 times (or vortex briefly).			
	Briefly	y centrifuge tubes co	ntaining miRNA agomir to ensure that the solution is			
	collec	ted at the bottom of	the tube. Aliquot the miRNA agomir into small volumes

Product Data Sheet

and store at \leq -20°C. miRNA agomir is stable (for 6 months under the specified storage condition). For best results, use in 3 months and limit freeze-thaw events for each tube no more than five times.

Storage/Stability Shipped at 4 °C. Store at -20 °C for one year. Avoid freeze-thaw cycles after reconstitution.
