## hsa-miR-455-5p miRNA Agomir

| Catalog #          | Source      | Reactivity               | Applications  |
|--------------------|-------------|--------------------------|---|
| CMJ0317            | Synthetic   | н                        |   |
| Description        | Synth       | etic miRNA Agomir is u   | used to regulate the expression of target hsa-miR-455-5p    |
|                    | mRNA        | Α.                       |   |
| Specificity        | Agom        | ir is chemically-modifi  | ed double-strand miRNA mimics which can mimic               |
|                    | matu        | re endogenous miRNA      | after transfection into cells. They can up-regulate the     |
|                    | endo        | genous miRNA activity    | by utilizing the natural miRNA machinery. Our miRNA         |
|                    | agom        | ir is designed to mimic  | mature miRNAs, and chemically modified to increase          |
|                    | their       | stability and activity.  |   |
| Form               | Lyoph       | ilized powder            |   |
| Gene Symbol        | hsa-m       | niR-455-5p               |   |
| Accession No.      | MIMA        | AT0003150                |   |
| Components         | This s      | ynthetic miRNA is base   | d on the mature miRNA sequence. The antisense strand        |
|                    | of the      | e agomir has 2 phospho   | prothioates at the 5' end, 4 phosphorothioates, 1           |
|                    | chole       | sterol group at the 3' e | nd, and full-length nucleotide 2'-methoxy modification.     |
|                    | It exh      | ibits enhanced cellular  | uptake, stability and regulatory activity in vivo.          |
| Directions for U   | lse Briefly | y centrifuge tubes cont  | aining miRNA agomir to ensure that the miRNA pellet is      |
|                    | locate      | ed at the bottom of the  | tube. Dissolve miRNA agomir to a convenient stock           |
|                    | conce       | entration using the reco | ommended volume of DEPC H2O (or RNase-free water).          |
|                    | For ex      | ample: dissolve 5 nmc    | l miRNA agomir to 20 $\mu$ M using 250 $\mu$ l DEPC H2O (or |
|                    | RNase       | e-free water). Pipette t | he solution up and down 3-5 times (or vortex briefly).      |
|                    | Briefly     | y centrifuge tubes cont  | aining miRNA agomir to ensure that the solution is          |
|                    | collec      | ted at the bottom of tl  | ne tube. Aliquot the miRNA agomir into small volumes        |
| Application key: F |             | lestern hlot IH- Immunoh | istochemistry IE- Immunofluorescence EC- Flow cytometry IC- |

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish

### **Product Data Sheet**

and store at  $\leq$  -20°C. miRNA agomir is stable (for 6 months under the specified storage condition). For best results, use in 3 months and limit freeze-thaw events for each tube no more than five times.

**Storage/Stability** Shipped at 4 °C. Store at -20 °C for one year. Avoid freeze-thaw cycles after reconstitution.

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish
