| Description        | Synth              | Synthetic miRNA Agomir is used to regulate the expression of target              |  |  |  |  |
|                    | hsa-m              | niR-6855-5p mRNA.  |  |  |  |  |
| Specificity        | Agom               | Agomir is chemically-modified double-strand miRNA mimics which can mimic         |  |  |  |  |
|                    | matu               | re endogenous miRNA  | s after transfection into cells. They can up-regulate the    |  |  |  |
|                    | endo               | genous miRNA activity  | by utilizing the natural miRNA machinery. Our miRNA          |  |  |  |
|                    | agom               | agomir is designed to mimic mature miRNAs, and chemically modified to increase   |  |  |  |  |

and store at  $\leq$  -20°C. miRNA agomir is stable (for 6 months under the specified storage condition). For best results, use in 3 months and limit freeze-thaw events for each tube no more than five times.

**Storage/Stability** Shipped at 4 °C. Store at -20 °C for one year. Avoid freeze-thaw cycles after reconstitution.
