hsa-miR-8059 miRNA Agomir

CMJ2533SyntheticHDescriptionSynthetic miRNA Agomir is used to regulate the expression of target hsa-miR-8059 mRNA.SpecificityAgomir is chemically-modified double-strand miRNA mimics which can mimic mature endogenous miRNAs after transfection into cells. They can up-regulate the endogenous miRNA activity by utilizing the natural miRNA machinery. Our miRNA agomir is designed to mimic mature miRNAs, and chemically modified to increase their stability and activity.FormLyophilized powderGene Symbolhsa-miR-8059Accession No.MIMAT0030986ComponentsThis synthetic miRNA is based on the mature miRNA sequence. The antisense strand of the agomir has 2 phosphorothioates at the 5' end, 4 phosphorothioates, 1 cholesterol group at the 3' end, and full-length nucleotide 2'-methoxy modification.

cholesterol group at the 3' end, and full-length nucleotide 2'-methoxy modification
cholesteror group at the 5 end, and fair heigh hadeotide 2 methoxy mounication.
It exhibits enhanced cellular uptake, stability and regulatory activity in vivo.
Directions for Use Briefly centrifuge tubes containing miRNA agomir to ensure that the miRNA pellet is
located at the bottom of the tube. Dissolve miRNA agomir to a convenient stock
concentration using the recommended volume of DEPC H2O (or RNase-free water).
For example: dissolve 5 nmol miRNA agomir to 20 μM using 250 μl DEPC H2O (or
RNase-free water). Pipette the solution up and down 3-5 times (or vortex briefly).
Briefly centrifuge tubes containing miRNA agomir to ensure that the solution is
collected at the bottom of the tube. Aliquot the miRNA agomir into small volumes

Application key: E- ELISA, WB- Western blot, IH- Immunohistochemistry, IF- Immunofluorescence, FC- Flow cytometry, IC-Immunocytochemistry, IP- Immunoprecipitation, ChIP- Chromatin Immunoprecipitation, EMSA- Electrophoretic Mobility Shift Assay, BL- Blocking, SE- Sandwich ELISA, CBE- Cell-based ELISA, RNAi- RNA interference Species reactivity key: H- Human, M- Mouse, R- Rat, B- Bovine, C- Chicken, D- Dog, G- Goat, Mk- Monkey, P- Pig, Rb-Rabbit, S- Sheep, Z- Zebrafish

Product Data Sheet

and store at \leq -20°C. miRNA agomir is stable (for 6 months under the specified storage condition). For best results, use in 3 months and limit freeze-thaw events for each tube no more than five times.

Storage/Stability Shipped at 4 °C. Store at -20 °C for one year. Avoid freeze-thaw cycles after reconstitution.
