Product Data Sheet

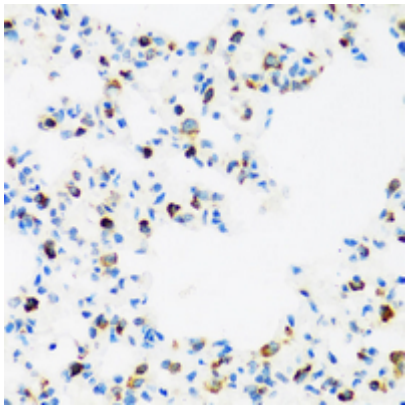
Western blot analysis of LRP6 expression in rat lung (A) whole cell lysates. (Predicted band size: 180 kD; Observed band size: 180 kD)



Immunohistochemical analysis of LRP6 staining in human breast cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
