

Product Data Sheet

ARRDC2 siRNA (Human)

e Reactivity	Applications		
etic H	RNAi		
Description siRNA to inhibit ARRDC2 expression using RNA interference			
ARRDC2 siRNA (Human) is a target-specific 19-23 nt siRNA oligo duplexes designed		go duplexes designed	
to knock down gene expression.			
Lyophilized powder			
ARRDC2			
Arrestin domain-containing protein 2			
27106 (Human)			
Q8TBH0 (Human)			
> 97%			
Oligonucleotide synthesis is monitored base by base through trityl analysis to ensure			
appropriate coupling efficiency. The oligo is subsequently purified by affinity-solid			
phase extraction. The annealed RNA duplex is further analyzed by mass			
spectrometry to verify the exact composition of the duplex. Each lot is compared to			
the previous lot by mass spectrometry to ensure maximum lot-to-lot consistency.			
We offers pre-designed sets of 3 different target-specific siRNA oligo duplexes of			
human ARRDC2 gene. Each vial contains 5 nmol of lyophilized siRNA. The duplexes			
can be transfected individually or poo	led together to achieve	knockdown of the	
target gene, which is most commonly assessed by qPCR or western blot.

Product Data Sheet

ARRDC2 siRNA (Human) - C	5 nmol x 1	5 nmol x 2
Negative Control	2.5 nmol x 1	2.5 nmol x 2
DEPC Water	1 ml x 1	1 ml x 2

Directions for Use

We recommends transfection with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube. Resuspend the siRNA oligos to an appropriate concentration with DEPC water. For example, resuspend one tube of 5 nmol siRNA oligo in 250 μ l of DEPC water to get a final concentration of 20 μ M.

Final volume	Final concentration	siRNA (20 μM)	Lipofectamin
