| Components | We of | We offers pre-designed sets of 3 different target-specific siRNA oligo duplexes of | | | |
| | huma | n IZUMO4 gene. Each | vial contains 5 nmol of | lyophilized siRNA. The duplexes | |
| | can be | e transfected individu | ally or pooled together | to achieve knockdown of the | |
| | target | target gene, which is most commonly assessed by qPCR or western blot. | | | |

Directions for Use

We recommends transfection with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube. Resuspend the siRNA oligos to an appropriate concentration with DEPC water. For example, resuspend one tube of 5 nmol siRNA oligo in 250 μ l of DEPC water to get a final concentration of 20 μ M.
